SERIES GX-2200

OUR MISSION, VISION AND VALUES

Since 2005, *Value Windows and Doors Inc*, a family owned corporation, has focused on building new fenestration products that are within reach without compromising on quality. We have successfully developed long term relationships with our customers and will continue to deliver superior *quality* windows and doors; provide exceptional customer *service* and pursue business through *innovation* and advanced technology.

Our company's vision is to be the industry leader by leveraging our German-inspired Resource Planning System alongside our commitment to advancing automation to efficiently bring innovative and on time delivery of products to our customers. Our active and energetic CEO has traveled extensively and exchanged ideas with reputable window and door manufacturers as well as various hardware suppliers all over the world with the goal of continuously introducing innovations to our products that will change the landscape of the industry.

We will continually strive to be a leader and a key player in the window and door industry by providing enhanced services that exceed expectations, build strong relationships and profitability to our esteemed customers whom we consider as business partners.

We believe in treating our customers with respect and faith. We grow through creativity, intervention, and innovation. We incorporate honesty, loyalty, integrity and business ethics into all aspects of our business functions. Backed by a strong and solid engineering team, continued innovation of all our existing and future products, and a commitment to the pursuit of excellence in product designs and customer service; rest assured that Value Windows and Doors Inc has the ability to serve all your replacement and new construction projects.

OUR TEAM

At Value, we control every step of the design process to ensure that each product we manufacture is of the highest quality.

The creativity of our international and interdisciplinary team of professionals with lengthy experience in the fenestration industry assures that all our windows and patio doors provide solutions for a variety of architectural needs.

NOT ALL VINYL IS THE SAME

Not all vinyl is the same. Many factors go into the quality of vinyl, that is why value uses its proprietary extrusion. Only 100% u-PVC should be used in the formulation of a vinyl window the U denotes that the material is unplasticised polyvinyl chloride. Many lesser windows will use plasticizers in their compounds which are cheaper to use but soften the material which reduces the material's strength causing warping, bending, or failure in the future. Another key to vinyl formulation is the additive of light(UV) and weathering stabilizers.

Nobody wants a yellow window or one that will crack and become susceptible to the elements. To prevent this Value uses the optimal amount of the UV and weather stabilizer titanium dioxide. All Value vinyl compounds must past accelerated weather and UV tests before being certified market ready. Next is the addition of impact modifiers. Many companies forgo this step which reduces the durability of the vinyl and can even lead to weaker welding joints. Not all vinyl is the same, make sure you know the difference and insure your home's integrity.

THERMAL CONTROL AND COST SAVINGS FOR YOUR HOME

All our products feature LoĒ³-366 glass which combined with Duralite spacers and Argon gas fill insure outstanding thermal performance and energy savings for your home. Learn more about our energy efficient glazing options.

LoĒ³-366 GLASS + DURALITE SPACER + ARGON GAS FILL

When the temperature soars, ordinary glass just can't handle the heat. And tinted glass spoils the view. To solve this issue Value has partnered with Cardinal Glass to use LoĒ³-366, which has been specially formulated to reject the sun's heat without affecting the view. Its proprietary triple silver coating lets more light while keeping more heat out, so your home stays cool and comfortable. With the insertion of Argon gas in between double pane glass combinations Value offers the excellent efficiency in thermal control and cost savings for your home.

What's more, LoĒ³-366 provides exceptional fading protection as well. It blocks 95% of the sun's damaging ultraviolet rays (a leading cause of fading), so it will help your furniture, carpets, curtains and wood flooring stay beautiful for years to come.

Cardinal LoĒ³-366 glass on outside glass pane of Galaxy sliding patio door

ENHANCED GLASS PERFORMANCE

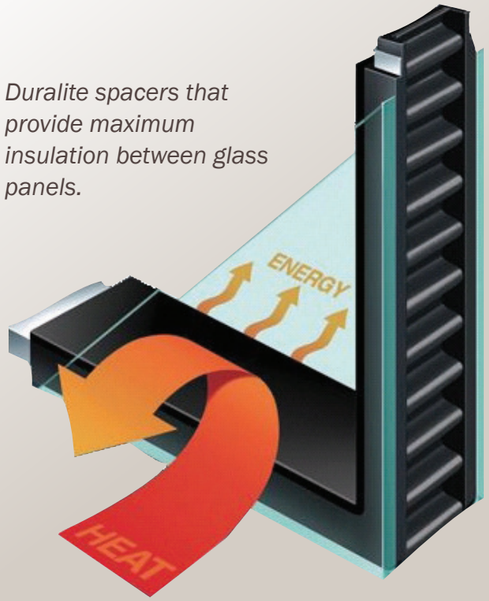

40% of a buildings energy loss is through Windows and Doors. With so much money flying out the window. It is imperative to place quality products in your building's openings. Typically, 75% of the exposed surface of a window and door is glass, and the temperature of the room-side of the glass directly affects the air temperature in the room. The better insulated the Window and Door glass, the more comfortable your room will be. Value Windows & Doors uses state of the art glass technology in all of its products reducing energy consumption and ensuring comfortable living.

All Value Series products feature Duralite spacers that provide maximum insulation between glass panels. Energy inside the home is kept where it should be, inside. Keep heat out during summer months and cold out during the winter.

- Composite laminating technology
- Polycarbonate spacer element, no metal
- A unique patented design
- Smooth surface appearance
- Black sight line
- Proven adhesive technology
- Superior argon gas retention
- Minimal compression required
- Lower conductivity polymeric warm edge spacer
- Improved condensation resistance
- Warmer edge of glass temperature

enviro sealed windows™ and doors

ARGON GAS FILL

When the temperature soars, ordinary glass just can't handle the heat. And tinted glass spoils the view. To solve this issue Value has partnered with Cardinal Glass to use LoĒ³-366, which has been specially formulated to reject the sun's heat without affecting the view. Its proprietary triple silver coating lets more light while keeping more heat out, so your home stays cool and comfortable. With the insertion of Argon gas in between double pane glass combinations Value offers the excellent efficiency in thermal control and cost savings for your home.

What's more, LoĒ³-366 provides exceptional fading protection as well. It blocks 95% of the sun's damaging ultraviolet rays (a leading cause of fading), so it will help your furniture, carpets, curtains and wood flooring stay beautiful for years to come.

ENERGY PERFORMANCE TESTING, CERTIFICATION, AND LABELING

The National Fenestration Rating Council (NFRC) operates a voluntary program that tests, certifies, and labels windows, doors and skylights based on their energy performance ratings. Then NFRC label provides a reliable and standardized way to determine a window's energy properties and to compare products.

The NFRC label can be found on all Energy Star® qualified window, door, and skylight products, but ENERGY STAR bases its qualification not only on U-factor and solar heat gain coefficient (SHGC) ratings, described in the next page.

About Ratings

Heat Gain and Loss

Windows, doors, skylights can gain and lose heat through:

-Direct conduction through the glass or glazing, frame, and/or door
-The radiation of heat into a house (typically from the sun) and out of a house from room temperature objects, such as people, furniture, and interior walls
-Air leakage through and around them

These properties can be measured and rated according to the following energy performance characteristics:

U-factor is an indicator for how insulating your overall window is. The lower the U-Factor number, the more energy-efficient the window/door is. Especially important in colder climates.

Solar heat gain coefficient (SHGC) is the is the amount of heat the window absorbs, and transmits to the inside of your house. The lower the SHGC, the less solar heat it transmits and the greater its shading ability. A product with a high SHGC rating is more effective at collecting solar heat during the winter. A product with a low SHGC rating is more effective at reducing cooling loads during the summer by blocking heat gain from the sun. Your home's climate, orientation, and external shading will determine the optimal SHGC for a particular window, door, or skylight.

Air leakage is how much air is leaking into your house through the window when there is a pressure difference. Typically, drafty homes have high air leakage windows and doors. A product with a low air leakage rating is tighter sealing than one with a high air leakage rating.

Sunlight Transmittance

The ability of glazing in a window, door, or skylight to transmit sunlight into a home can be measured and rated according to the following energy performance characteristics:

Visible transmittance (VT) is how much visible light is going into your house through your window and door. A product with a higher VT transmits more visible light. VT is expressed as a number between 0 and 1. The VT you need for a window, door, or skylight should be determined by your home's daylighting requirements and/or whether you need to reduce interior glare in a space.

THERMAL PERFORMANCE, AESTHETIC APPEAL

GALAXY FAMILY OF WINDOWS AND PATIO DOORS SERIES GX-2200

Galaxy Windows and Doors Series GX-2200 add function and Beauty to any project. Designed to integrate modern window technology with clean beautiful lines, all while staying budget friendly. A modern beveled frame creates added thickness and multiple chambered airspace that increases thermal efficiencies. The increased frame width allows for ¾" glass units containing state of the art glass technology.

Cardinal 366 glass comes standard with argon filled interior. So, whether your looking to upgrade the aesthetics of your building or reduce your cooling and heating bills with the latest in thermal technology Galaxy Series is the perfect fit for any project.

GALAXY SLIDING WINDOWS SERIES GX-2201

When something stands the test of time we call it a classic. Sliding windows have long been used in American homes for their ease of use and space saving nature. Value Galaxy series sliders have improved on an American classic by reducing friction with a raised rail, nylon roller housing and metal wheels. Our rail system insures that only the wheels touch the track to eliminate resistance. While competition use plastic, Value has integrated metal wheels to insure strength and prevent damage from debris that can collect on the track. Galaxy sliders are engineered to provide a modern touch to an American classic.

SLIDING WINDOWS FEATURES & BENEFITS

Easy operation
Dual metal rollers are durable and help insure smooth openings and closings.

A tight seal
Value's multiple weather-strips give you protection against air infiltration

Simple to clean
Sliding sash can be removed to clean exterior glass from inside your home

Design
Elegant beveled frame design with multiple glass, grid, and configurations available

Security
Auto locks insure that every time you close the window your home is sealed, giving you security and peace of mind

Structural Integrity
The mechanically fastened joints of aluminum frames may admit air and water. Fusion-welded uPVC joints create an impervious seal.

Maintenance
Unlike aluminum and wood, uPVC is virtually maintenance free. It never needs paint, and requires only an occasional wash and wipe to clean.

Weatherability
Metals can corrode from exposure to weather and pollution. uPVC is naturally resistant to moisture and atmospheric pollutions such as acids, alkalis and salt air making it the prefect material to stand the test of time.

Energy Efficiency
The superior insulating properties of vinyl designed with heat reducing Multi-chambered profiles and Cardinal 366 glass Reduce Heat transfer up to 3 x that of standard single pane windows.

Standard colors

GALAXY TILT-IN SINGLE HUNG WINDOWS SERIES GX-2202

Galaxy Single hung windows are engineered with performance and functionality at the core. All Galaxy Hung windows include pivoting sashes that tilt inward for easy cleaning and access to both operable and fixed sashes. With advanced glass engineering designed by Cardinal, Galaxy hung windows include 366 triple silver glass as a standard.

With all the extra glass used for energy efficiency the sound of a window slamming shut by itself is all too common. While many windows still use century old technology where a string is attached to counterweights or a spring to open the window, Value has worked with engineers to come up with a modern fix. Strings and springs that become worn and snap have been replaced with rust resistant metal coils. The elimination of springs that provide different amounts of resistance as they become more compressed allows for a much smoother and uniform operation of the sash.

Our constant force counterbalance allows you to open your window as far or as little as you like without the fear of the window crashing down. No more worrying about your window hanging on by a thread, update your home with technology for the 21st century.

- *Effortless long lasting performance*

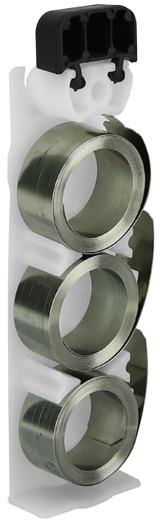

Constant Force *Coil Balance System*

The ability to vertically move the sash in our single hung windows rests in a constant force balance system operated by interlocking 1/2" stainless steel coil springs in natural color housings, which allows the closing force to be constant on any position of the sash.

Different length units are used based on the height of the window and may have up to four coils which allow for effortless operation of moving sash.

Individual coil

Coils in casing

BALANCE COMPARISON: BLOCK & TACKLE vs. CONSTANT FORCE

Block & Tackle Balance

Many windows still use an old system where a string is attached to counterweights or a spring to open the window, these strings and springs after wear and tear can snap and require extra force to move the window sash.

Constant Force Balance System

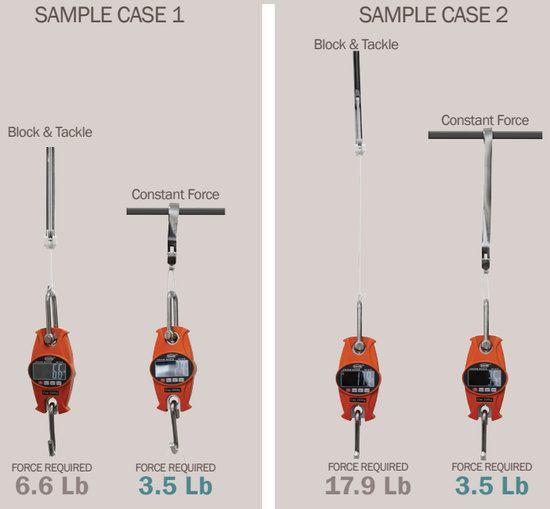

Value's constant force balance coil features a nylon composite housing that allows the coil to be stretched as the window opens.

As the coil unfolds it provides a constant and even force meaning the window needs only the same resistance to lift it at any degree of opening.

Our constant force counterbalance allows you to open your window as far or as little as you like without the fear of the window crashing down.

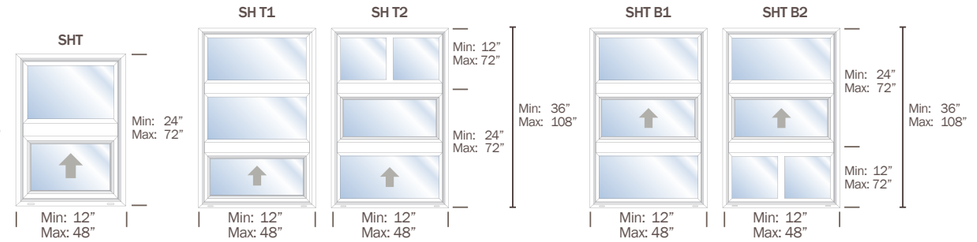

*How much **force** is needed to operate each system?*

Each constant force balance coil is housed in a nylon composite housing that allows the coil to be stretched as the window opens. As the coil unfolds it provides a constant and even force meaning the window needs only the same resistance to lift it at any degree of opening.

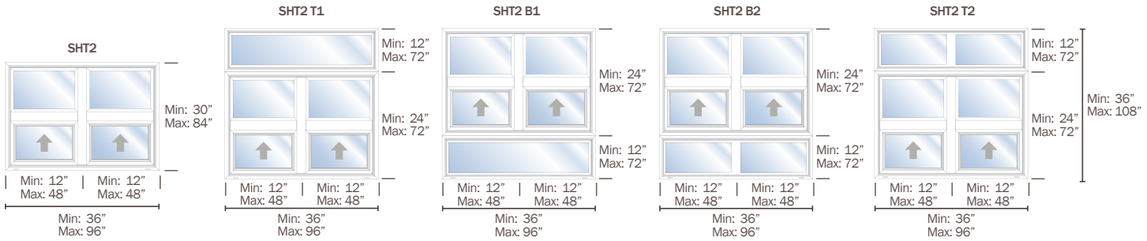

SINGLE HUNG WINDOWS STYLING

SH windows are available with one or two top or bottom picture windows.

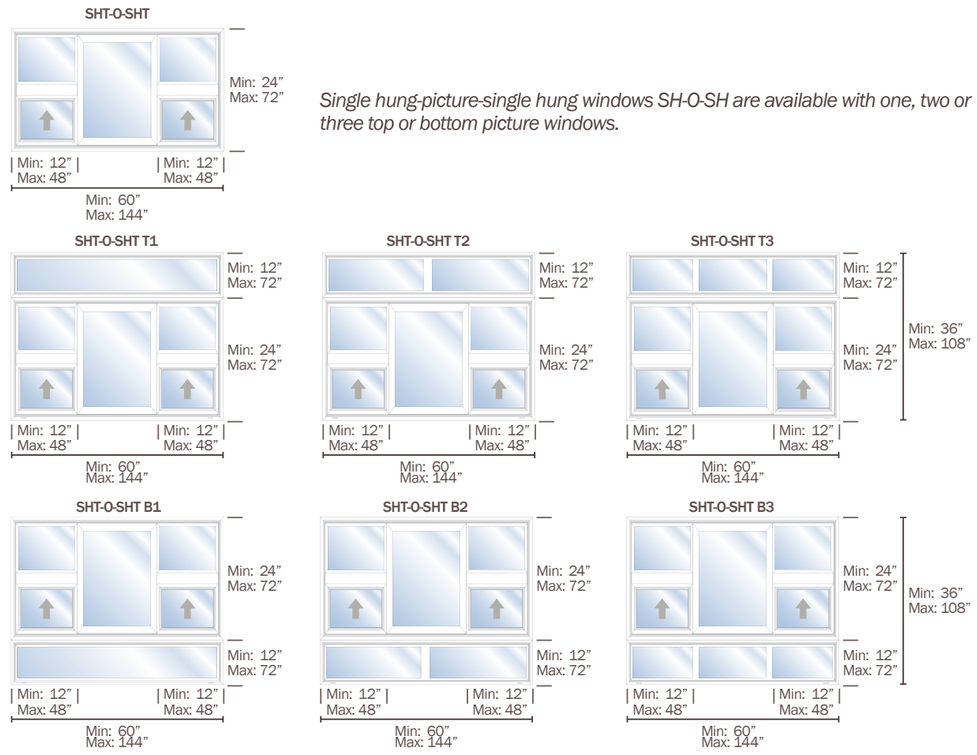

DOUBLE SINGLE HUNG WINDOWS

Double SH windows are available with one or two top or bottom picture windows.

SH-O-SH WINDOWS

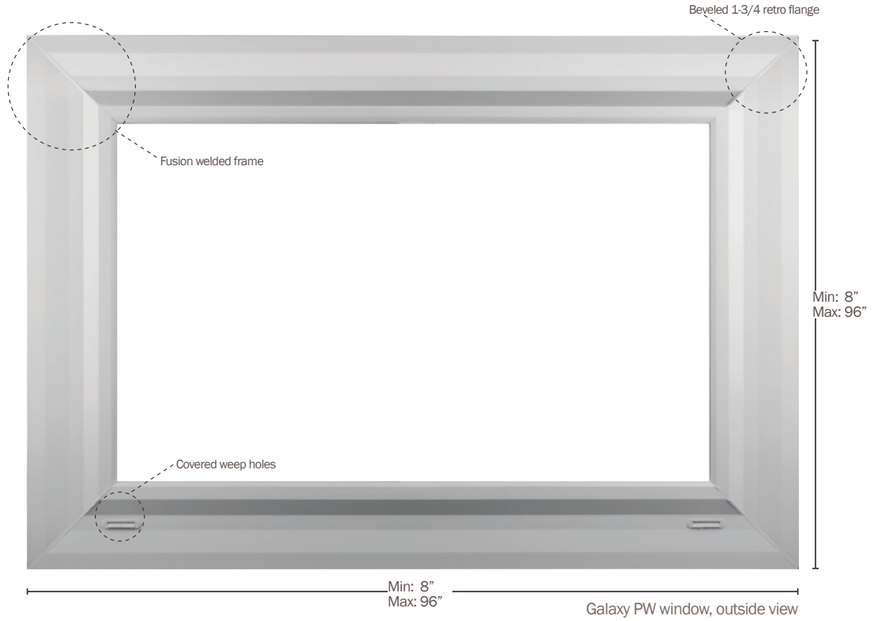

Single hung-picture-single hung windows SH-O-SH are available with one, two or three top or bottom picture windows.

GALAXY PICTURE WINDOWS SERIES GX-2206

Picture windows are a simple and elegant touch to any room. Placed right they are a frame to the world outside. Value Galaxy series picture windows are designed to offer an aesthetically pleasing beveled contour, with optimal thermal and structural properties. The beveled contour allows for wider glass units and more interior chambers significantly reducing thermal transfer into the home. Use of a non-metallic Duralite spacer to separate glass panes also allows Value to offer lower heat transfer than the competition using metal spacers that conduct heat. So, enjoy the view, light up your room all while keeping your home cooler and energy efficient.

YOUR SOLUTION FOR GRAND OPENINGS

AVAILABLE FOR WINDOWS
96-144 UNITED INCHES

AVAILABLE FOR WINDOWS 96-144 UNITED INCHES

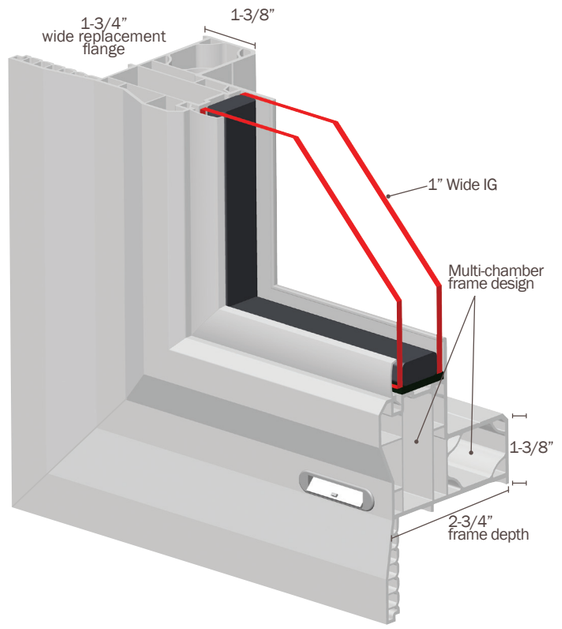

GALAXY OVERSIZED PICTURE WINDOWS SERIES GX-2206

YOUR SOLUTION FOR GRAND OPENINGS

A picture-perfect window. Galaxy picture windows come in a variety of sizes and options to fit your design and budget. Standard picture windows are available up to 96 united inches and provide excellent performance and value. For larger window openings, greater than 96 U.I. our specially engineered picture window frame is designed to carry the weight of a 1" glass unit with ¼" glass. This allows for maximum visibility and unobstructed views from your home to the great outdoors with sizes up to 144 united inches.

RETROFIT OVERSIZED PICTURE WINDOW OUTSIDE VIEW

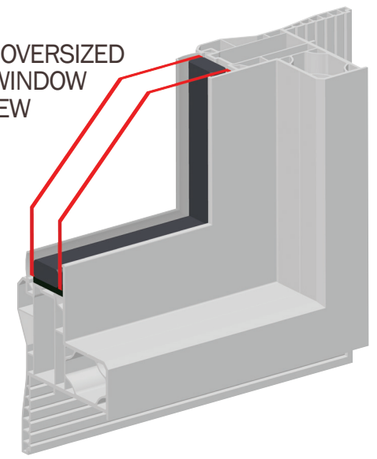

AVAILABLE FOR WINDOWS 96-144 UNITED INCHES

Galaxy oversized Picture Windows are available for Retrofit and Block applications. This frame has additional chambers and can hold glass units of 1" to accommodate the thicker and heavier glass required for large surface areas. The perfect solution for oversized picture windows that are 96-144 united inches.

Contact your Sales Representative for lead time and shipping arrangements.

THERMAL PERFORMANCE, AESTHETIC APPEAL

GALAXY SLIDING PATIO DOORS SERIES GX-2221

Value Galaxy Series Sliding Patio Doors are crafted for easy operation and elegant design. Galaxy doors include a wide French rail sash to give a substantial French door look while providing the space saving flexibility of a slider.

Galaxy doors are reinforced with steel throughout to provide support and security. Our wheel base is supported by the steel core to prevent the weight of the sash from pushing the wheels into the vinyl which is a common issue with competitors non-reinforced wheels. A proprietary aluminum triangle monorail lifts the sash off the track to minimize friction, while our high strength steel (or optional stainless steel) rollers glide across the rail. Heavy duty 2" wheels with bearings can hold 125 LBS each and with at least 8 per door they effortlessly slide the sash over the track. Our concave wheel design insures there is no slipping from the track like other companies flat or rounded wheel bases, making for a smooth, maintenance free ride every time.

1" Glass unit width is standard to maximize air space thermal efficiency as well as sound reduction. Galaxy Series Patio Doors are the perfect fit for any room.

Key features

- Multi-chambered heavy duty extruded vinyl for structural strength and durability
- Frame depth is 5-5/8”
- Fusion welded corners for strength and stability
- 1” IG featuring Duralite spacer with warm edge technology for energy efficiency
- Door panels feature a multi-channel extrusion for increased energy performance and strength
- Steel and aluminum reinforcement for exceptional strength
- Heavy duty aluminum rail system offers smooth operation
- Galvanized steel rollers for added durability and quiet functionality
- Ergonomic handle with dual point locking system for ease of use and tight seal against elements infiltration
- 1” set-back nail-on fin for targeted installation
- 1-3/8” set-back nail-on fin available in white color
- Replacement flange designed with heavy-duty dual wall construction is 2-1/2” wide
- Argon gas filled chamber for increased energy savings

Options

- Flat and sculptured grids in a variety of patterns
- Standard and custom sizes
- Factory stacking and mulling options in many different combinations
- AAMA and NFRC certified to meet or exceed industry structural and energy efficiency standards
- May be ordered to meet ENERGYSTAR® requirements
- Lifetime Warranty (Does not include glass breakage)

FRAME TYPES FOR REPLACEMENT & NEW CONSTRUCTION APPLICATIONS

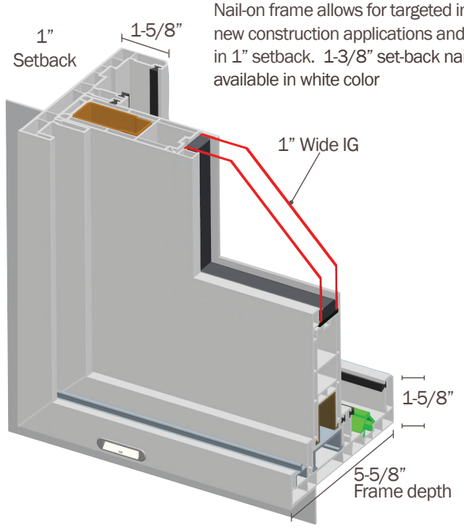

RETROFIT

For replacement applications. This frame type allows convenient installation without the need to break stucco. 2-1/2” replacement flange is also available.

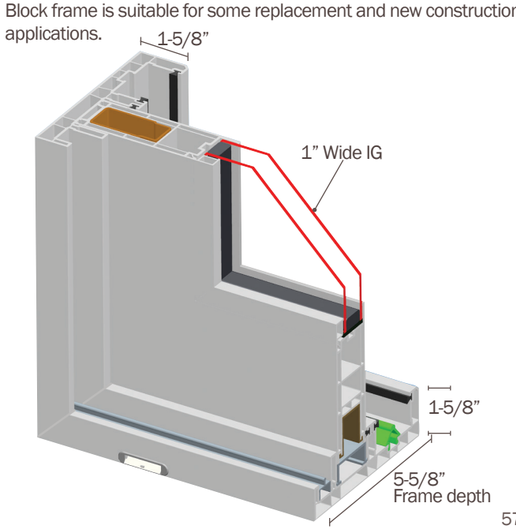

NAIL-ON

Nail-on frame allows for targeted installation in new construction applications and is available in 1” setback. 1-3/8” set-back nail-on fin available in white color

BLOCK

Block frame is suitable for some replacement and new construction applications.

OUTSTANDING QUALITY HARDWARE & PARTS

Four wheel tandem roller system

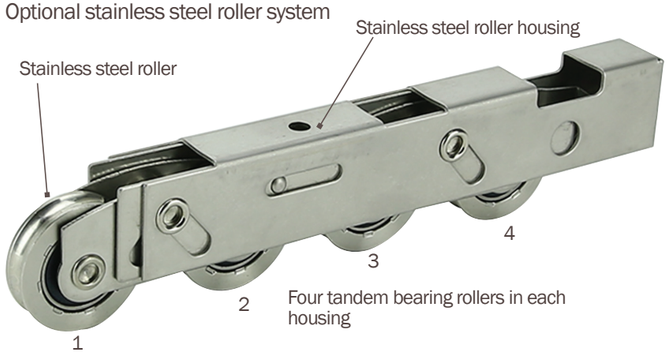

Galaxy Patio Doors feature four- wheel tandem roller system in cold rolled steel housing and rollers, which provide long lasting smooth operation.

An optional commercial grade rolling system with casing and wheels in stainless steel is available upon request and is designed to effortlessly carry the our heavies door panels.

Optional Stainless Steel Roller Features

- *Stainless steel housing*
- *Four strong tandem stainless steel concave rollers for quiet and durable rolling action*
- *Rollers slide on a heavy duty stainless steel track glider for smooth and soundless operation*
- *Each roller can hold up to 125 lbs for a total of 1000 lbs per door panel which delivers outstanding performance in large doors featuring the heaviest glass packages*
- *Rollers can be adjusted for smooth moving action*

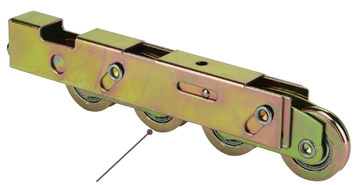

Optional stainless steel roller system

Four tandem bearing rollers in each housing

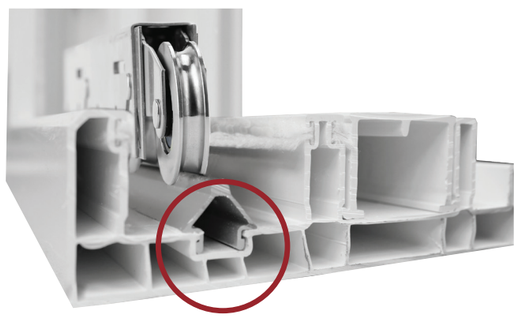

Concave roller design for smooth gliding action

Standard roller system in cold rolled steel

Aluminum rail system

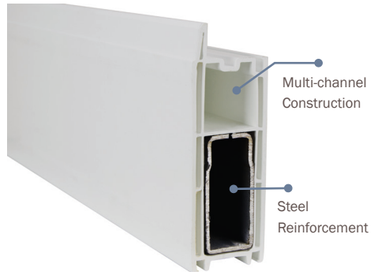

Heavy duty aluminum rail system is standard on all Galaxy Series sliding patio doors. This offers a smoother glide when opening and closing the door. Aluminum is also resistant to erosion and rust.

Double weatherstripping

SOLID & DURABLE CONSTRUCTION & DESIGN

Door panel vinyl extrusion

Dual latch lock

Galaxy sliding doors feature a new dual latch lock which provides extra security and a tight weather seal. New ergonomic handle closes easily in a single motion.

GALAXY SWING DOORS SERIES GX-2222

Value Galaxy series swing doors are one of the most popular items for any home renovation. They provide convenient access while creating unimpeded views that flood interior spaces with natural light. While old-style patio doors were notorious for heat loss, leakage and poor security, Galaxy swing doors offer significant improvements. Multi chambered frame and sash designs coupled with cardinal 366 glass and argon filled air space create excellent thermal efficiency. Innovative hardware is showcased on Galaxy swing doors that incorporate the latest in multi-point locking mechanisms for increased security and adjustable hinges for long term functionality.

Add decorative glass or grids and choose from a variety of hardware finishes to match your décor. With endless options and configurations and excellent functionality, it’s the perfect door for any application.

Key features

- Multi-chambered heavy wall extruded vinyl for structural strength and durability
- Frame depth is 5-5/8”
- Fusion welded corners for strength and stability
- 1” IG featuring Duralite spacer with warm edge technology for energy efficiency
- Door panels feature a multi-channel extrusion for increased energy performance and strength
- Aluminum reinforcement for structural integrity
- Heavy duty hinges are standard
- Commercial grade continuous hinges in oversized doors provide outstanding support for heavier panels
- Ergonomic handle with multi-point locking system allows to close and lock the door in one motion
- 1” set-back nail-on fin for easy installation
- 1-3/8” set-back nail-on fin available in white color
- Replacement flange designed with heavy-duty dual wall is 2-1/2” wide
- In-swing or out-swing operation
- Side lites are available and can be fixed or operable
- Argon gas filled chamber for increased energy savings

Options

- Flat and sculptured grids in a variety of patterns
- Standard and custom sizes
- Factory stacking and mulling options in many different combinations
- AAMA and NFRC certified to meet or exceed industry structural and energy efficiency standards
- May be ordered to meet ENERGYSTAR® requirements
- Lifetime Warranty (Does not include glass breakage)

FRAME TYPES FOR REPLACEMENT & NEW CONSTRUCTION APPLICATIONS

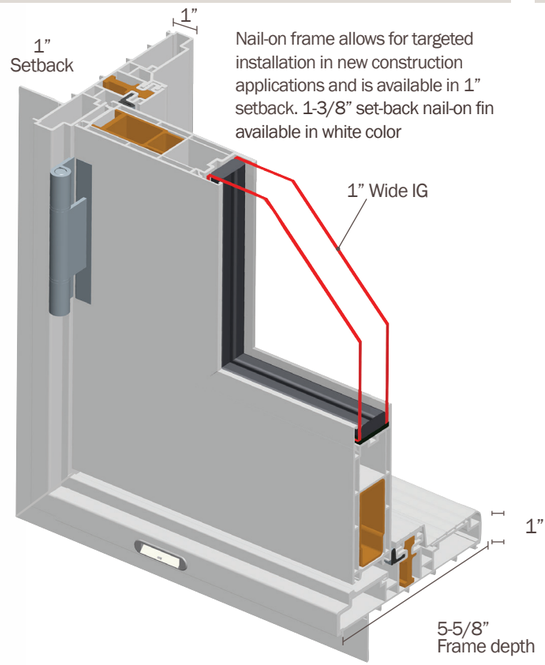

RETROFIT

For replacement applications. This frame type allows convenient installation without the need to break stucco. 2-1/2” replacement flange.

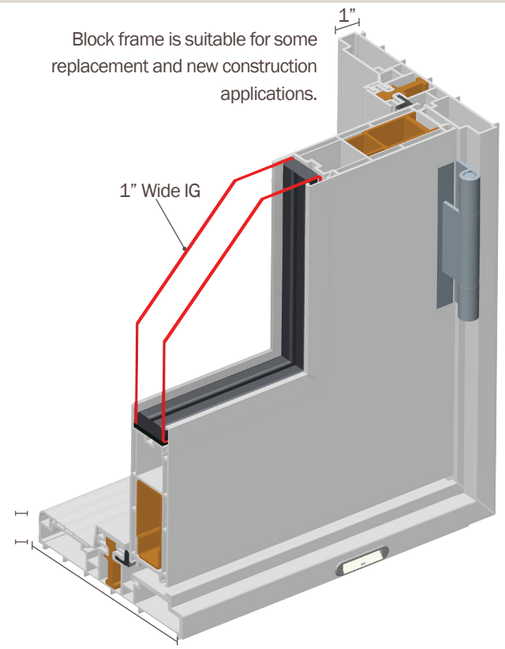

NAIL-ON

Nail-on frame allows for targeted installation in new construction applications and is available in 1” setback. 1-3/8” set-back nail-on fin available in white color

BLOCK

Block frame is suitable for some replacement and new construction applications.

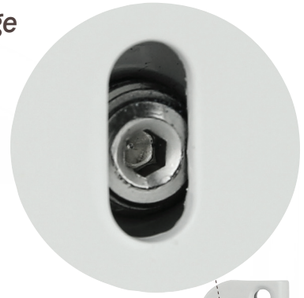

Standard Size Door Hinge

Galaxy Swing doors come standard with an adjustable butt hinge that can easily be adjusted to insure proper locking and lifelong security. Designed by ASSA-ABLOY these heavy-duty hinges carry the weight of the sash for smooth effortless operation.

Depending on weight 3 or 4 hinges may be used on conventional sized doors. For large custom sized doors Galaxy series has engineered its continuous hinge with added support to accommodate sashes up to 42" wide. Perfect for a single door that needs to meet ADA compliance.

Hinge can be adjusted for even position of door handle and when the door is in a closed position.

Standard Size Swing Door Hinge, Inside View

Standard Size Swing Door Hinge, Outside View

ENGINEERED TO LAST

Swing Door Handle and Locking System

Galaxy Doors multi-point locking system provides excellent security and weatherproofing. Simply pull the handle up and shoot bolts at the top and bottom of the sash engage into the metal reinforced frame. For additional security simply twist the thumb turn to engage an additional deadbolt in the center of the door.

Ergonomically designed door handle and dual point locking system

Dual weather stripping for a tight seal, optional keyed handle shown

Optional Keyed Handle available in White and Almond to match the door color

OUTSTANDING QUALITY HARDWARE & PARTS

Concealed Continuous Hinges

Value's French Swing Doors feature commercial grade continuous hinges which deliver a long life and allow outstanding stability of the door's panels.

Our heavy duty continuous hinges are made of high-strength aluminum with a full-length rolling gear profile to align doors perfectly from top to bottom. Special self-lubricating polyacetal load bearing blocks deliver smooth, almost floating operation on even the heaviest doors. Hinges are completely secure because all mounting hardware is concealed when door is in the closed and locked position

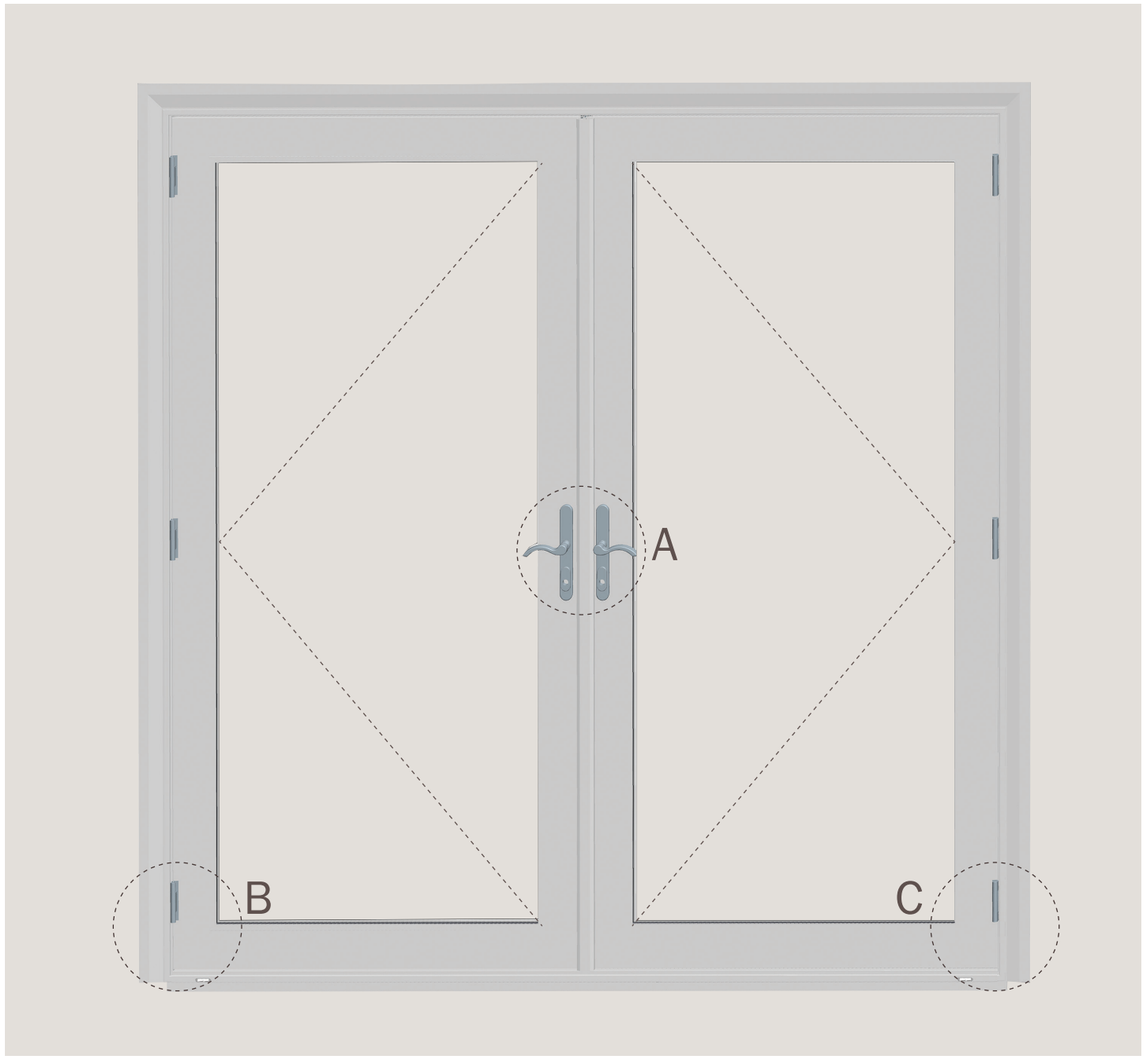

Continuous Hinge Features and Benefits

- All Hinges are anodized after machining is done to provide longer life and reduce corrosion
- Precision extruded components deliver smooth operation and long service life.
- Our hole pattern is designed for targeted installation providing the required attachment points needed to carry the weight

Emergency Egress Windows Residential Dwellings

Minimum Sized Rescue or Egress Windows from Sleeping Room

Basement, habitable attics and every sleeping room shall have at least one operable window or door approved for emergency escape or rescue that shall open directly into a public street, public alley, yard or exit court. The emergency door or window shall be operable from the inside to provide a full, clear opening without the use of separate tools.

The intent of this section is that windows be available so that rescue can be effected from the exterior or, alternatively, by which one may escape from that window to the exterior of the building without having to travel through the building itself.

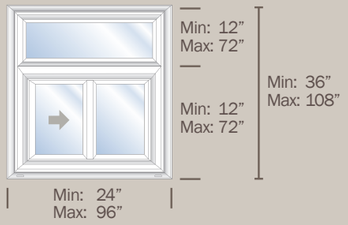

- Escape or rescue windows shall have a minimum net clear openable area of 5.7 square feet. (Except at grade floor, shall have a minimum net clear opening of 5 square feet).
- The minimum net clear openable height dimension shall be 24 inches.
- The minimum net clear openable width dimension shall be 20 inches.
- Finished sill height shall not be more than 44 inches above the floor.

GALAXY SINGLE HUNG WINDOWS SERIES GX-2202 SH WINDOWS EGRESS CHART SASH IN

Emergency Egress Windows Residential Dwellings

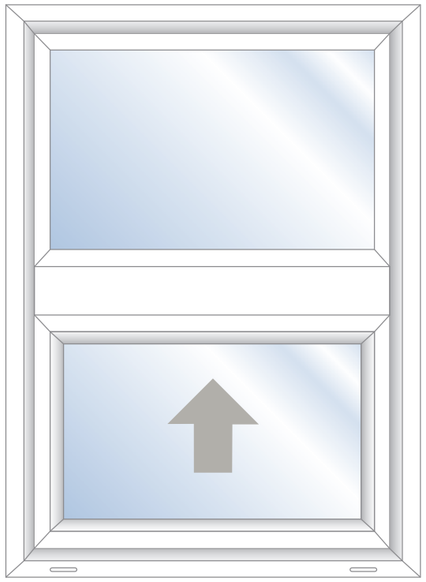

Minimum Sized Rescue or Egress Windows from Sleeping Room

Basement, habitable attics and every sleeping room shall have at least one operable window or door approved for emergency escape or rescue that shall open directly into a public street, public alley, yard or exit court. The emergency door or window shall be operable from the inside to provide a full, clear opening without the use of separate tools.

The intent of this section is that windows be available so that rescue can be effected from the exterior or, alternatively, by which one may escape from that window to the exterior of the building without having to travel through the building itself.

- Escape or rescue windows shall have a minimum net clear openable area of 5.7 square feet. (Except at grade floor, shall have a minimum net clear opening of 5 square feet).
- The minimum net clear openable height dimension shall be 24 inches.
- The minimum net clear openable width dimension shall be 20 inches.
- Finished sill height shall not be more than 44 inches above the floor.

VALUE WINDOWS & DOORS
TRUSTED PARTNERS

Cardinal Glass

Since 1962, Cardinal's mission has been to provide the highest quality glass products for residential windows throughout the world.

Cardinal Industries is our trusted glass provider, from energy efficient glass to annealed and tempered options we, rely on Cardinal's products to manufacture high quality insulated glass units.

Energy efficiency is all about maintaining optimal temperatures with minimal energy loss. With Cardinal LoE^3 glass installed window heat can be dramatically reduced. This helps keep your home cool and comfortable. Ordinary window glass simply does not compare.

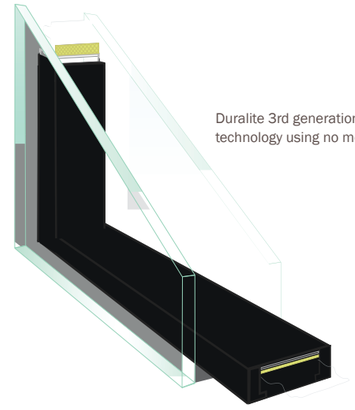

In cold weather months, heating costs increase energy consumption. Usually, 75% of an exposed window is glass. This directly affects the temperature inside. Better insulation will keep your home warmer and heating cost down.

Cardinal's LoE^3 glass provides outstanding protection against fading and ultraviolet damage, substantially blocking harmful rays will help avoid sun damage and fading inside the home. Visible light still shines through for brightness without significant darkness or tinting effects.

enviro sealed windows™ and doors Powered by **Duralite®**

Warm Edge Technology.
All Value Series products feature Duralite spacers that provide maximum insulation between glass panels. Energy inside the home is kept where it should be, inside. Keep heat out during summer months and cold out during the winter.

- Composite laminating technology
- Polycarbonate spacer element, no metal
- A unique patented design
- Smooth surface appearance
- Black sight line
- Proven adhesive technology
- Superior argon gas retention
- Minimal compression required
- Lower conductivity polymeric warm edge spacer
- Improved condensation resistance
- Warmer edge of glass temperature

Duralite 3rd generation warm-edge technology using no metal

INTERLOCK
ASSA ABLOY

With generations of experience in designing, manufacturing and distributing window and door hardware across the globe, the collective ingenuity of the team at Interlock USA has been decades in the making. Perhaps best known as the inventor of the automatic sash lock system for vinyl windows, Interlock specializes in working closely with window and door manufacturers to create innovative hardware designs that differentiate their products from the competition.

Through innovative design, superior technical support and personalized service, Interlock creates unique, sophisticated hardware solutions that consistently hit the mark with consumers—both in form and function.

With worldwide resources through ASSA ABLOY, and partnerships with globally recognized companies such as the SIEGENIA-AUBI Group (SIEGENIA-AUBI & KFV), Dr. Hahn and Brio, Interlock USA provides comprehensive, solutions for window and door manufacturers throughout North America. With a global foot print, Interlock ASSA Abloy provides high quality hardware for several window and door applications.

Interlock USA is proud to be a member of the American Architectural Manufacturers Association (AAMA).
